Heart | Definition of Heart by Merriam-Webster At the heart of that waterfront redevelopment project is the new V&A Dundee, Scotland's first design museum and the only V&A Museum outside of London. Picture of the Heart - WebMD The heart is a muscular organ about the size of a fist, located just behind and slightly left of the breastbone. The heart pumps blood through the network of arteries and veins called the cardiovascular system. The heart has four chambers: The right atrium receives blood from the veins and pumps it to the right ventricle. Heart (symbol) - Wikipedia The heart shape (♥) is an ideograph used to express the idea of the "heart" in its metaphorical or symbolic sense as the center of emotion, including affection and love, especially romantic love. The "wounded heart" indicating lovesickness came to be depicted as a heart symbol pierced with an arrow (Cupid's), or heart symbol "broken" in two or more pieces.

Human Heart: Anatomy, Function & Facts - Live Science An adult heart beats about 60 to 80 times per minute. Newborns' hearts beat faster than adult hearts, about 70 to 190 beats per minute. The heart pumps about 6 quarts (5.7 liters) of blood throughout the body. The heart is located in the center of the chest, usually pointing slightly left. 3 Ways to Make the Heart Symbol Using a Computer - wikiHow The heart symbol was introduced in Unicode 1.1.0 back in 1993, and should be visible on virtually any device. Quick Summary On Windows , open Character Map from the Start menu, scroll down until you find the heart icon, double-click the icon to select it, click Copy , and then paste it into a text program or field by pressing Ctrl + V. How to Make a Heart Symbol With My Keyboard - Techwalla Select the heart symbol from the list of search results and click the Select button to add it to the Characters To Copy field. Click Select several times to add more hearts. Click Copy to copy all symbols in the Characters To Copy field to the clipboard.

Heart | anatomy | Britannica.com Heart: Heart, organ that serves as a pump to circulate the blood. It may be a straight tube, as in spiders and annelid worms, or a somewhat more elaborate structure with one or more receiving chambers (atria) and a main pumping chamber (ventricle), as in mollusks. In fishes the heart is a folded tube. Heart - Wikipedia The heart is a muscular organ in most animals, which pumps blood through the blood vessels of the circulatory system. Blood provides the body with oxygen and nutrients, as well as assists in the removal of metabolic wastes. Heart - Idioms by The Free Dictionary This maddened me, and I sat brooding for a time over the injuries I had suffered, and the cruelties which she I loved had endured for my sake, until my heart swelled and grew sore, and my teeth were clinched.

Human Heart Diagram and Anatomy of the Heart The heart is a muscular organ about the size of a closed fist that functions as the body's circulatory pump. It takes in deoxygenated blood through the veins and delivers it to the lungs for oxygenation before pumping it into the various arteries (which provide oxygen and nutrients to body tissues by transporting the blood throughout the body).
