Advantages and Challenges of Wind Energy | Department of ... Wind energy doesn't pollute the air like power plants that rely on combustion of fossil fuels, such as coal or natural gas, which emit particulate matter, nitrogen oxides, and sulfur dioxideâ€”causing human health problems and economic damages. Wind Energy, Wind Power, Wind Farm and Wind Turbine ... Wind turbines, like windmills, are mounted on a tower to capture the most energy. At 100 feet (30 meters) or more aboveground, they can take advantage of the faster and less turbulent wind. Turbines catch the wind's energy with their propeller-like blades. Usually, two or three blades are mounted on a shaft to form a rotor. Wind Energy Facts â€” Wind Power & Wind Turbine Facts Wind energy is cost competitive with other fuel sources. Wind energy creates jobs. Wind energy is an indigenous, homegrown energy source that helps to diversify the national energy portfolio. Wind energy can provide income for farmers and ranchers, as well as economic benefits to communities. Wind energy is an inexhaustible renewable energy source.
